

ClearView Summer Release 2021

Dashboard Package

Queue Counter Module

This module gives queue information at a glance

New Dashboard Sharing Flow

This new sharing flow option gives users an option to access their data, modules and groups. It also grants the ability to make changes to the dashboard. However, these changes will not save.

Wallboard Package

Game Results on Wallboards

Allows an overview of game(s) to be shown on wallboards, including all game types.

Gamification Package

Games Module Copy Changes

This will update the information shown to include the end date of a game interval (one instance) and the games end date (the date that all instances will end).

Challenges Tab Updates

Current challenges to match history table

Auto Join Players

This is an option in the setup of a game where a supervisor can automatically add players into a game. They won't be required to join via the games module to be a participant

Revert Game Payout

Ability to revert a payout of a game
